

## Hospital Force by Kinetic Productions

Last Saturday morning, Lower and Middle School had the opportunity to enhance their science knowledge by watching a 'Carry on' style musical comedy by Kinetic Theatre Productions. The children learned about forces and pressure, magnetism, and the heart and blood along with Dr. A. Sthetic and her colleagues. Some of the children (and an enthusiastic Mr Gould!) were invited on stage to perform the Forces Song, to act as Red Blood Cells picking up oxygen or indeed to weigh the baby in Newtons.

Georgina, Libby, Jamie and Mr Gould perform the Forces Song.

Dr A. Sthetic and her nurse demonstrates the Circulatory System.

Christabel measures how many Newtons the baby weighs.

Zara, Benjamin, Lauren and Mahmoud become Red Blood Cells picking up oxygen.

"I liked the bit when they sprayed us with water". Alex 4A.

"I learned that there are 10 million Red Blood Cells in one prick of blood". Alexander 5L.

It was fun when the doctor swapped with the dummy". Zoe 6M.

"We saw eyeballs floating and sinking in water". Cora 5G.
